

WiFi Configuration

- **iOS:** From version 11 of iOS (planned to be released in the fall of 2017) you can scan WiFi configuration with the built-in camera app. To connect, tap on the *Join "foo" Network* notification.
- **Android:** Use the app *Barcode Scanner* from *ZXing Team* available in *Play Store* and tap *Connect to Network* after scanning the WiFi configuration.
- **Other:** Use the WiFi configuration below.

SSID: foo
Password: bar
Security: WPA
