📶 WiFi Configuration

- 🍎 **iOS:** From version 11 of iOS you can scan QR WiFi configuration with the built-in camera app. To connect, tap on the *Join "foo" Network* notification.

- 🤖 **Android:** Use the app *Barcode Scanner* from *ZXing Team* available in *Play Store* and tap *Connect to Network* after scanning the QR WiFi configuration.

- 🖥 **Other:** Use the WiFi configuration below.

SSID:	foo
Password:	bar
Security:	WPA

Router Web Administration
